## SKILLS

- **Programming Languages:** Java, Python, C ++, C#
  - **Technologies:** HTML, CSS, JavaScript, PHP (basic) Databases: MySQL, SQLite
  - **Frameworks & Tools:** VS Code, Git Debugging & Operating Systems: Windows
  - **Other Tools:** MS Office, Canva (for simple design), Google Workspace
  - **Tools:** Git, VS Code, Postman
  - **Concepts:** OOP, Debugging, SDLC, Problem Solving
  - **Platform:** ServiceNow (Beginner Level-Training/Interest)
  - **Other:** Fast Learner, Logical Thinking, Team Collaboration
- 

## WORK EXPERIENCE

Glow Touch Technologies, Mangalore

September 2024 - October 2025

**WEB TROUBLESHOOTING ENGINEER (GRADUATE ENGINEER TRAINEE)**

- Analyzed data, validated information accuracy, and documented findings to support operational workflows.
- Prepared structured reports, logs, and insights for internal teams, reinforcing analytical and reporting skills.
- Investigated issues using data patterns and root-cause analysis techniques.
- Supported coordination between teams, ensuring accuracy and timely completion of tasks.
- Strengthened attention to detail through quality checks, validation steps, and escalation procedures.

---

## EDUCATION

**Pre-University Course (PUC) – Commerce** 2019 - 2021

Gurukula P U College, Kundapura

- Studied core subjects: Commerce & Computer Science Developed strong logical reasoning and analytical skills.
- Built early interest in programming and problem- solving

**Bachelor of Computer Application (BCA)** 2021 - 2024

Dr. B B Hegde First Grade College, Kundapura

- Built a strong foundation in programming and databases
  - Completed projects using Java, Python, and MySQL
  - Actively participated in coding workshops and tech events
  - Focused on backend development and real-world problem solving
- 

## PROJECTS

**1. ClaimGuard Analytics System** November 2024  
**Python, SQL, Excel, Power BI**

- Engineered a P&C claims analysis system to clean, validate, and transform large datasets for reporting.
- Identified trends, risk patterns, and high-severity claims using Python and SQL analytics.
- Generated KPIs and dashboards to visualize claim ratios, severity distribution, and risk categories.
- Automated insights and improved decision-making through structured analytics workflows.

**2. RiskVision Data Monitoring System**  
**Python, SQL, Excel, JavaScript**

- Built a lightweight data monitoring system to track anomalies, inconsistencies, and performance trends across transactional datasets.
  - Cleaned, validated, and transformed large datasets using Python and SQL to ensure accuracy and reliability.
  - Designed a dynamic insights panel using JavaScript + Excel charts to visualize key metrics such as error frequency, high-risk entries, and system health indicators.
  - Automated alerts and summary reports, enabling faster issue detection and improved operational decision-making.
- 

## LANGUAGES

- English : Fluent
  - Marathi : Conversational
  - Hindi : Fluent
  - Kannada : Basic
