PROFILE

BCA graduate with a solid foundation in computer applications and 1+ years of professional experience in web troubleshooting and client support. Proficient in Java, Python, and SQL, with practical knowledge of backend development and debugging. Known for strong problem-solving skills, fast learning ability, and a genuine passion for building clean, efficient code. Currently seeking a software developer role to apply my technical background, customer-focused mindset, and commitment to continuous learning in a fast-paced development environment.

EDUCATION

Pre-University Course (PUC) – Commerce
Gurukula P U College, Kundapura

2019-2021

- Studied core subjects: Commerce & Computer Science
- Developed strong logical reasoning and analytical skills
- Built early interest in programming and problem-solving

Bachelor of Computer Application
Dr. B B Hegde First Grade College, Kundapura

2021-2024

- Built a strong foundation in programming and databases
- Completed projects using Java, Python, and MySQL
- Actively participated in coding workshops and tech events
- Focused on backend development and real-world problem solving

EXPERIENCE

Glow Touch Technologies, Mangalore

September 2024 - October 2025

WEB TROUBLESHOOTING ENGINEER (GRADUATE ENGINEER TRAINEE)

- Managed and optimized Domain.com & Network Solution hosting infrastructure, automation saving 15% manual hours.
- Collaborated with clients to resolve technical issues, ensuring 99% uptime.
- Gained hands-on-experience in PHP, phpMyAdmin; and cloud environments.

PROJECTS

1. Instagram Clone App
Flutter, Dart, Firebase, Android Studio

November 2024

 • Developed a mobile app replicating core Instagram features like photo sharing, user login, profiles, and likes/comments
• Integrated Firebase Authentication and for secure data handling and real-time updates
• Focused on clean UI design, responsive layouts, and efficient state management
Keywords: Flutter, Dart, Firebase, Android Development, Mobile App, Social Media App, Real-time Database

2. RideVista – Uber Clone for Tier-3 Cities
HTML, CSS, JavaScript, Firebase

March 2025

- Designed and deployed a responsive taxi booking web platform targeted at rural and semi-urban users.
- Implemented booking logic, driver assignment, and ride scheduling using Firebase Realtime Database.
- Optimized user interface for mobile use and low-bandwidth conditions
- Keywords: Web Development, JavaScript, Firebase, Ride Booking System, Frontend-Backend Integration, Responsive Design

2. Jobsphere – Job Portal Web Application

October 2025

Front-end: JavaScript (React.js), HTML, CSS
Back-end: JavaScript (Node.js, Express.js),
Database: NoSQL – MongoDB (querying via JavaScript)

- Developed a responsive web platform connecting job seekers with employers, streamlining job search and application processes.
- Implemented front-end using React.js and back-end with Node.js/Express, with MongoDB for data storage.
- Integrated user authentication, job posting, and application tracking features for seamless user experience
- Optimized performance and UI/UX, enabling faster navigation and improved accessibility.
